FOR IMMEDIATE RELEASE

ANTHONY MACHINE EXPANDS SERVICES WITH THE INTEGRATION OF APS PLASTICS

TOMBALL, TX, August 2020. Anthony Machine, South Texas' largest CNC and manual machine shop based in San Antonio announced today that it is expanding their machining services with the integration of APS Plastics, located in Tomball, Texas.

Established in 2006, APS Plastics is a full-service plastic component manufacturer serving the Oil & Gas, Aerospace, Medical, Food Processing, PetroChem & Power, and Electronics industries. It serves a blue chip roster of leading companies by providing high quality machining services of Thermoplastics, Thermoset plastics and composites in both a small lot and production run basis.

“APS Plastics is the perfect complement to our already robust services here at Anthony Machine,” said Eugene Ponomarev, General Manager. “We now have expanded our machining capabilities in materials, sizes and tolerances. In addition, APS has an exceptional Quality Management program and they share our focus on quality and the timely delivery of products to customers.”

The integrated business will operate under the direction of Eugene Ponomarev with sales operations consolidated under the direction of Steve Fraunhofer, Vice-President of Sales. “This addition to the company allows us to broaden our offerings to our customers and expand our reach into new industries. The economic landscape has changed so drastically in 2020, we’re excited to go out to our customers with an enhanced service offering.” commented Mr. Fraunhofer.

The Tomball, Texas location will now serve both APS and Anthony Machine customers in Houston and surrounding areas, while continuing to serve its customers throughout the United States and across the globe.

“Our chief focus will be continuing to service our customer base with the highest quality components in both plastics and metals while also offering great value,” said Eugene Ponomarev.

ABOUT APS PLASTICS

APS Plastics manufactures parts from .030” to 8” in diameter and in a wide range of materials to include all types of high performance plastics. APS is ISO 9001:1998 certified in precision machining of engineered plastic and composite components and has been in operation since 2006.
